

Building deeper connections and communities with your members!

What is Zenvoy?

Your members have similar interests and are looking for new ways to interact with each other and your association online. Zenvoy is a matchmaking and community platform that introduces your members who would benefit from meeting each other. Whether for business development, education, best practice sharing, or just plain social networking, Zenvoy creates new bonds for everyone.

How does it work?

Zenvoy is private, customizable networking platform that helps associations create and manage their own A.I. driven networking communities. Think LinkedIn® meets eHarmony® meets NextDoor®— just for your association. Custom algorithms cultivate valuable one-on-one connections that are a great fit for your members' business interests and desire for deeper connections within their industry.

Zenvoy empowers you to:

- Build a unique networking experience that brings your members and potential members closer together around their interests and the issues they care about
- Promote collaboration as you feature new topics, campaigns and initiatives
- Provide enhanced opportunities for exploring career progression, industry mindshare, and business development
- Raise retention, loyalty, and member engagement through a proactive 1-on-1 networking solution you control!
