

Building Deeper Employee Connections and Communities

What is Zenvoy?

Your corporation is big and can be hard to navigate. Zenvoy is an employee matchmaking and community platform that introduces team members who will benefit from meeting. Whether for mentorship, team building, best practice sharing, support for an initiative like diversity or women in leadership, or just plain networking, Zenvoy creates new bonds for everyone.

How does it work?

Zenvoy is private, customizable networking platform that helps companies create and manage their own A.I. driven networking communities. Think NextDoor meets eHarmony meets LinkedIn – just for your company. Custom algorithms cultivate valuable one-on-one connections that are a great fit for your company's business interests and your employees desire for deeper connections within their company. Communities, networks and friendships drive employee satisfaction and retention.

Zenvoy empowers you to:

- Build a unique networking experience that brings your employees and communities closer together around their interests and the issues they care about
- Promote collaboration as you onboard acquisitions or new divisions and teams
- Provide enhanced opportunities for exploring career progression, diversity and minority connections and mentorship
